

**FAMVAR INTERNATIONAL SECONDARY SCHOOL**  
**JSS1 AGRIC PROJECT**

Plant three bean seeds in a plastic container containing loamy soil(a transparent plastic cup preferably)

- A. Soak the beans in water overnight to aid the germination process.
- B. Place the bean seeds in the cup and cover with soil
- A. Water them daily and expose them to sunlight and air.
- B. Take records of the daily growth of the plant for 12 days.
- C. From your observation, what are the conditions necessary for a bean plant to grow?
- D. What type of seed is a bean seed?
- E. What is the function of the bean seed as a plant part?
