## CLASSIFICATION OF MUSICAL INSTRUMENTS

### Classification of Nigerian Musical Instruments

Nigerian musical instruments can be classified into four

- (a) Aerophones are Nigerian musical instruments that produce sound by blowing air into

them

(b) Idiophones are Nigerian musical instruments that produce sound by beating their bodies.

(c) Chordophones are Nigerian musical instruments that produce sound by plucking their strings.

(d) Membranophones are Nigerian musical instruments that produce sound through an animal skin which is beaten by hand or stick.

### **CLASSIFICATION OF FOREIGN MUSICAL INSTRUMENTS**

Foreign musical instruments can be classified into five:

(a) Woodwind are Foreign musical instruments that produce sound by blowing air through a reed or wooden tube. However due to modern technology, some woodwinds such as flute are made of metals. Many modern recorders are made of plastic.

(b) Brass are Foreign musical instruments that produce sound through a metal mouthpiece.

(c) Percussion are foreign musical instruments that produce sound by beating their bodies.

(d) Strings are Nigerian musical instruments that produce sound through strings by bowing or plucking them.

(d) Keyboard are Foreign musical instruments that produces sound when their keys are pressed down.
